

JOVAN MAUREL BASTIAN

Software Developer (Frontend / Fullstack) — Banking & Financial Systems
Greater Jakarta, Indonesia | +62 822-9747-2843 | jcjo92@gmail.com

PROFESSIONAL SUMMARY

Software Developer with strong experience in frontend engineering and growing specialization in fullstack and backend-oriented banking systems. Proven track record in building, integrating, and maintaining enterprise-grade web applications, hybrid systems, and unified messaging platforms within regulated financial environments.

PROFESSIONAL EXPERIENCE

Software Developer — PT Bank KEB Hana Indonesia
September 2025 – Present

- Developing and maintaining Unified Messaging System (UMS) for Hana Bank and LINE Bank, handling multi-channel messaging flows (SMS, email) and vendor integrations.
- Implementing backend-facing features such as request validation, response normalization, error handling, and delivery status tracking.
- Designing and maintaining REST API integrations between frontend, internal services, and external vendors.
- Developing and maintaining LINE Bank's landing website with focus on performance, security, and scalability.
- Building frontend modules for Aplikasi Jaminan Online (AJO) PLN to support Bank Guarantee lifecycle processing integrated with PLN systems.
- Maintaining and enhancing LINE Bank's hybrid web system, ensuring cross-platform compatibility and system stability.
- Collaborating closely with backend engineers, QA, and product teams to deliver secure, auditable banking solutions.
- Applying clean architecture principles, reusable components, and version-controlled workflows using Git.

Front-end Developer — PT Bank Sinarmas Tbk
August 2024 – September 2025

- Developed enterprise frontend applications for Loan Management System (LMS) and ABL System using Next.js and TypeScript.
- Implemented workflow approval, restructuring, and collection modules deployed to national production environments.
- Integrated REST APIs using Axios, Promise-based handling, and useSWR for data synchronization.
- Handled production deployment setup, merge requests, and conducted peer code reviews.
- Implemented unit testing using Jest to improve application reliability.
- Developed reusable UI components using Material UI, Sinarmas Design System, and Tailwind CSS.
- Collaborated across systems (CLS, LMS, LOS) to ensure functional alignment.

Front-end Developer — PT Mandala Multifinance Tbk
January 2023 – August 2024

- Developed React-based internal applications for head office and branch operations.
- Delivered production-ready modules with national deployment coverage.
- Maintained and refactored existing codebases to improve stability and maintainability.
- Worked closely with UI/UX designers and cross-functional teams.

Front-end Developer — PT Digital Integrasi Asia
June 2022 – December 2022

- Developed and maintained React Native-based social media application.
- Implemented real-time video call, chat, and gifting features with Agora integration.
- Led frontend task assignments within sprint planning cycles.
- Migrated UI implementation toward TypeScript-based architecture.

Front-end Developer & UX Engineer — Olympic Furniture Group
June 2021 – December 2021

- Designed and developed partner landing pages and internal event platforms.
- Produced UI/UX designs using Figma and translated them into production-ready frontend code.

Front-end Developer Intern — PT Maybank Indonesia Finance Tbk
March 2020 – February 2021

- Completed onboarding covering frontend, backend, and mobile development fundamentals.
- Developed mobile credit analyst application and produced UI wireframes.

EDUCATION

Bina Nusantara University — Computer Science
2017 – 2021 | GPA: 3.25 / 4.00

TECHNICAL SKILLS

JavaScript, TypeScript, React, Next.js, React Native, REST API, Axios, useSWR, Jest, Git, Tailwind CSS, Material UI, Firebase, HTML, CSS
